

QuESTech Special Training Session 2, Konstanz, February 26, 2019

Paper writing: “How to start” to “how to publish”

Publishing your results, regardless if it is your PhD thesis or your next article is the currency in modern science. It might not be the dearest occupation to you, but it is a decisive one and might well play an important role in what your future research opportunities are.

A-Z of scientific writing

- Strong message
- Story arc
- Figures that tell the story
- Scientific writing style
- Step by step writing process
- Daily writing routine
- Submission and referee process

Working on your text

In this workshop we will cover the whole process of paper writing. For that we are going to work on your texts. There are different exercises throughout the course, for you to apply the learned material to your own writing. Please bring a laptop and your scientific texts to the seminar (Bachelor, Master thesis, as well as any published or upcoming papers).
